Intended Audience

Second, Third and Fourth Year Fellows in Gastroenterology

Course Description

This course is designed to increase knowledge, competence, and performance of advanced therapeutic endoscopy techniques among gastroenterology trainees. Information will be delivered through lectures, audience question and answers, and presentation of procedural techniques at hands-on learning stations. Best practice techniques across a broad spectrum of therapeutic endoscopy will be presented by a faculty of nationally known interventional endoscopists.

Learning Objectives

- Review important quality metrics in ERCP and understand basic tips and tricks for cannulation, stone and stricture management
- Discuss the latest approach to colorectal and duodenal endoscopic mucosal resection
- Outline the basics of endoscopic submucosal dissection and its current indications
- Discuss the endoscopic management of benign and malignant biliary diseases
- Discuss the role of EUS for both tissue acquisition and drainage
