Intended Audience

Second, Third and Fourth-Year Fellows in Gastroenterology

Course Description

This course is designed to increase knowledge, competence, and performance of advanced therapeutic endoscopy techniques among gastroenterology trainees. Information will be delivered through lectures, audience question and answers, and hands-on educational sessions. Best practice techniques across a broad spectrum of therapeutic endoscopy will be presented by a faculty of nationally known interventional endoscopists.

Learning Objectives

By attending this course, learners will be able to review, discuss or demonstrate:

- ERCP techniques for safe and successful biliary and pancreatic cannulation, sphincterotomy and cholangioscopy
- Endoscopic management of benign and malignant biliary strictures
- Various options and techniques for EUS-guided biopsy
- Indications, contraindications, and techniques for EUS-guided drainage
- Optimal approaches for endoscopic mucosal resection, endoscopic submucosal dissection and ablation
- Various options for mucosal and full-thickness closure after resection or perforation
- Techniques for endoscopic assessment of GI luminal strictures and placement of luminal stents

Agenda

7:30 am	Registration
8:00 am – 9:00 am	Welcome Christopher J. DiMaio, MD and Robin B. Mendelson, MD Breakfast Program
